1" wide by 25 yards  
1 1/4" wide by 25 yards  
colors: black, white, ivory

**Price is \$7.50 on-line.**

**FOR HEMS:**

1/2" KNIT stay tape for narrow hems or very wide hems on knit and or light weight fabrics.

1/2" STRAIGHT stay tape for narrow or wide hems on woven fabric or fabric that you do not wish to have give or stretch.

One inch or 1 1/4" KNIT INTERFACING/TAPE for a 1" or 1 1/4" hem on knit and or light weight fabrics.

*To apply: Place the stay tape or interfacing tape fuse side up on the wrong side of the fabric and machine baste at 5.0. Serge to clean finish the edge, turn up the hem and press in place, then stitch in the hem. This is not a totally secure hem. The fusible stay tape is not meant to hold the hem permanently in place; only to hold hem in place until you stitch in place.*

1/4" or 1/2" DOUBLE SIDED stay tape to fuse sheer lace hems in place. The double sided is so sheer it will not be seen. This is not a totally secure hem, you should stitch in place.

*To apply: Place the double sided stay tape web side to wrong side of the fabric, press on the paper to fuse tape to fabric. Peel away the paper, turn up the hem, press in place and top stitch.*

PLEASE USE THE 1/2" KNIT STAY TAPE IN PLACE OF BIAS TAPE ON ALL KNITS AS THE KNIT STAY TAPE IS MORE COMPATIBLE WITH KNITS. THE KNIT STAY TAPES, AS WELL AS ALL MY OTHER TAPES, ARE MANUFACTURED TO MY SPECS, WHICH ALLOWS ME TO OFFER THEM TO MY CUSTOMERS AT A SUBSTANTIAL SAVINGS.

**FOR SEAMS:**

For shoulder seams use 1/2" STRAIGHT stay tape.

For the crotch seam use 1/2" STRAIGHT stay tape.

For sheer side and sleeve seams use 1/2" KNIT stay tape to support side and sleeve seams in fabric that is sheer or needs help to be stable so the fabric can go thru a sewing machine and or a serger without gathering or going down into the bobbin or looper area.

For the Carwash Skirt facing seam use 1/2" KNIT stay tape.

For pleated fabric press 1/2" KNIT stay tape gently on all seams to keep pleats from spreading. Then stitch garment together.

**FOR NECKLINES:**

1/2" KNIT stay tape to stabilize a low cut neckline such as a tank top neckline.

1/2" KNIT stay tape to stabilize a neckline that will have a collar hanging from it.

One inch or 1 1/4" KNIT INTERFACING TAPE as a none fabric facing. It shapes and has less bulk.

1/2" STRAIGHT stay tape on the front of a cardigan from the fold back line up into the garment for stabilization of neckline (see patterns).

1/4" and/or 1/2" double sided to hold turn down necklines in place, then top stitch.
